EXPERIENCE:

Montana State Culinary Services – Bozeman, MT Nov 2023 – May 2026

Student Supervisor

- Create a welcoming and positive customer experience while serving food and beverages to customers.
- Maintain food and equipment following health code guidelines.
- Communicate regularly with supervisors and peers to create a functional workflow in both the kitchen and warehouse.
- Represent and train team members in the expected standards and procedures around the job site.

Montana State Projects – Bozeman, MT Aug 2020 – May 2026

Student

- Created a vet clinic website using JavaScript, Java, Python, HTML, htmx, CSS, and SQL.
- Created a multi-stage third person video game with a teammate creating custom player models and using player animations in Unity and Blender using the C# and C++ languages.
- Created a tic-tac-toe game using logic gates, wires, capacitors, breadboards, and LED's.
- Worked as a team to design and create a low power RC car using C++, PCB's, motors, Arduino board, 9V battery, and other components, then optimized this design to a faster and more robust build of the RC car.
- Completed classwork on the MSU servers, during this I gained experience working in Command Prompt.
- Designed and implemented parts of a compiler including scanning, parsing, and memory management.
- Created victim and perpetrator virtual machines to learn various cyber security attacks and data forensics.
- Created a self navigating AI agents using heuristic search, stochastic search, planning, and more.

Side Projects – Stockton, CA / Bozeman, MT Jan 2017 – Present

Self Motivated

- Using compatible hardware I built three computers, installed operating systems, and connected the computers to the internet and various printers, projectors, and monitors.
- Working with AI models to create content for a target audience on social media.
- Creating a medieval roguelike video game with a small team, using Flax and Blender.
- Created a playable minigame website that managed user accounts, items, and transactions.
- Attended a Valley Hackathon and collaborated with a team to create a tic-tac-toe game in Java in 24 hours.
- Repaired Screens and replaced ports, logic boards, and buttons for older Apple iPhones.
- Hosted private servers for friends where I learned how to port forward and update files in the servers.

EDUCATION & CERTIFICATIONS:

Montana State University – Bozeman, MT Aug 2020 – May 2026

B.Sc. in Computer Science (Graduated May 2026)

Relevant Coursework: Advanced Web Development, Computer Security, Networks, Artificial Intelligence, Database Systems, Advanced Software Engineering, Data Structures and Algorithms, Discrete Structures, Concepts of Programming Languages, Compilers, Computer Science Ethics, Calculus, Statistics, Linear Algebra, Data Mining.

SKILLS:

Team Collaboration	Time Management	Diligence
Verbal and Written Communication	Adaptability	Yearning for Learning
Comfortable being Uncomfortable	Problem Solving	Quality Assurance
